Why Managed WiFi?

The need to be connected is ever increasing and the internet can be a powerful tool for education. As devices get smaller and more portable it's vital that schools have the right wireless connectivity to aid with teaching and learning, administration, communication and security.

Wireless that works

No two schools are the same so we don't believe in a 'one-size-fits-all' solution. We have developed a range of wireless network services that give schools broad, strong and reliable coverage and meet the specific budgetary and safeguarding requirements that education establishments require.

We work with a variety of hardware providers to ensure we can offer you a solution that best fits your needs.

Key benefits

A range of hardware options offering great value

Secure authentication allowing correct access for the right users

Widespread coverage for connectivity across the school

Energy efficient technology that keep both utility and hardware costs down

Modern, futureproof technology that won't need replacing anytime soon

An easily scalable service that you can grow with your school

Bring your own device (BYOD) controls designed to keep your network safe

Control in school hands via a management website

Site survey making sure you get the best value

Leading support by our UK service desk

Multiple SSID networks for flexible connectivity

Compatible with most commonly used switching for further cost savings

A simple facility for the creation of guest accounts for set timeframes

Remote system status monitoring helping you keep track

Cloud managed removing the need for cumbersome or expensive controller hardware to maintain and support

*Please note some key benefits are dependent on your choice of hardware. For the best configuration for your school please speak to a member of our team.

Site survey

With a wireless network, deployment is key. If required, to ensure you get the best coverage and to make sure you aren't purchasing equipment surplus to your needs, we'll conduct a comprehensive, no obligation site survey at your school telling you how many access points are required and where to have them. To book a site survey please get in touch.

School-level management

With a dedicated management webpage, nominated personnel within a school are able to manage and configure their WiFi networks how they like.

Schools can:

- ✓ Review SSID preferences and authentication method
- ✓ Set which users have access
- ✓ Create guest passes for a determined timeframe

Help and support

Any WiFi service from us is underpinned by our industry-leading help and support. A UK-based service desk of dedicated professionals that are there when you need them and are experts on the services we offer. Not just for if something goes wrong, but to help make sure you are getting the most out of your new WiFi deployment.

Getting you set-up

USO integration

If you already have a WiFi network we are also able to enhance your implementation by integrating your wireless hardware with USO (Unified Sign On), our award-winning authentication platform.

Authentication

USO serves as an identity provider to over 2 million staff, students and parents across the country, helping keep them safe online and serves to allow access to your WiFi based on policies you create.

Please note this is dependent on your school owning WiFi equipment that we support but rest assured, all popular brands are already covered and more are being included. Please get in touch with a member of the team for a quote.

Web filtering

WebScreen is our bespoke school web filtering service. Currently in use in over 2,800 schools nationwide WebScreen will work seamlessly in the background to offer tailored internet filtering from the moment a user connects to the WiFi. WebScreen is available as an added-value purchase.

WebScreen™ 2.0

Multi-academy trusts

Our WiFi is ideally suited to work over schools within a MAT or based across multiple sites. Users who need to travel across sites will automatically 'jump' on to the WiFi at each site without having to re-enter or change a username or password.

What our schools say

“

“Our new wireless solution has made life at our school much easier as it fully integrates with our existing USO authentication processes allowing us to focus on other things.

The personnel were very knowledgeable and during the set-up and installation process helped us implement VLANs on the schools switching infrastructure, which has in turn greatly improved our network performance.”

St James' Catholic High School,
Barnet

”

Managed WiFi

- ✓ Fast, stable and resilient school WiFi
- ✓ A system tailored to your school's requirements
- ✓ A range of hardware providers to choose from
- ✓ Cloud-hosted controllers saving money and space
- ✓ Site survey for optimum coverage and value
- ✓ Leading technical support
- ✓ Extra benefits for schools across a MAT
- ✓ Industry-leading authentication platform

And much more
