## What is myHomework?

---

myHomework is a cloud-based service from Atomwide that puts the entire homework cycle online, saving teachers much-needed time and giving pupils the opportunity to boost their learning experiences with safe, reliable and engaging technology.

Atomwide has 30 years' experience producing specially designed IT services and solutions for UK schools by working closely with leading professionals in the education sector. myHomework has been produced in collaboration with both educational authorities and individual schools to ensure it proves a helpful resource for all users.

## London Grid for Learning / TRUSTnet schools

---

myHomework is available at no additional cost to all LGfL / TRUSTnet subscribing schools using SIMS or in primary schools using Integris G2.

As well as benefitting from huge cost savings by not having to pay for an online homework solution, LGfL / TRUSTnet schools are also uniquely placed to use myHomework in conjunction with London Grid's range of award-winning teaching and learning resources, as well as other IT resources from Atomwide such as the myDrive school cloud storage platform and other online safety and safeguarding tools.

## Why myHomework?

---

An affordable homework service specifically for UK schools

**FREE**

Included for LGfL / TRUSTnet connected schools

Simple and easy to use for staff members and pupils alike

Accessible anywhere with an internet connection

Optimised for smartphone and tablet use

No further requirement for teachers to carry around heavy books to mark

Drastically reduces the risk of homework being 'eaten by dogs' or 'left on the bus'

Grades are easily recorded in an online mark book

Links with selected MIS platforms to automatically populate your class-lists

Conveniently share results with pupils

SLT members can monitor the homework being set and the results across all relevant classes

Securely authenticated by USO both in and away from school

Integrates with myDrive cloud storage

# The myHomework cycle - online

---

## Teachers can...

[Class 7a](#)

[Class 8b](#)

[Class 9c](#)

Set differentiated homework for relevant pupils

Specify homework tasks

Set due dates

Supply additional sources or links to help pupils complete their work

Monitor if homework is overdue or already submitted

Mark at their convenience on a computer or tablet

Feedback comments to students

Record pupil's grades in an online mark book

Share the results with their classes

## Furthermore, leaders or SLT members can...

Check what homework is being set in their respective areas, and not only monitor how pupils are performing but also what is being set by teachers and how it is being marked.

## Pupils can...

Use myHomework to keep organised. An in-built calendar and list of current homework will keep them up-to-date with what assignments have been set, and when they are due.

When submitted, pupils' homework and any related documents submitted alongside are stored securely in one place, in the cloud. This means that pupils can easily find and refer back to previous assignments that they have completed.

## Parental engagement...

Studies show that the more a parent is involved and engaged with their child's education, the better the child will perform.

An optional extra in addition to myHomework, schools are able to set up ParentComms:Reporter – an online parental zone where parents can monitor their child's progress in terms of reports, behaviour, attendance and achievements.

ParentComms:Reporter will take all relevant information automatically and securely from the school's MIS so parents can keep up-to-date in near real-time.

ParentComms   
**REPORTER**

myHomework is a feature of myUSO, the cloud-based resource zone for schools.

As well as myHomework, myUSO also contains a series of helpful tools to help with teaching, learning and administration throughout the school. Other such features of myUSO include:

myDrive – Securely store your files in the cloud

myDrive Editor – Create and edit Microsoft documents in the cloud

USO-FX2 – Securely transfer sensitive data

LetterMerge – Easily create and send bulk emails or letters with your MIS data

myVideos – A safe way to watch appropriate educational content from online video sharing platforms

School Calendar – Keep staff, pupils and parents up-to-date with online, shared school calendars

## myUSO mobile app

---

The free myUSO app makes it even easier to keep on top of homework tasks anywhere with a connection with a smartphone or tablet.

As well as being able to upload completed homework, send feedback or comments to their teachers and check their marks, pupils can also use the app to save homework reminders to their personal phone calendars, and will also receive push notifications on when homework is due, has been set or when results have been published.

## How to set up myHomework?

---

If you are an LGfL or TRUSTnet connected school you can get started with myHomework straight away. Simply have a Nominated Contact log in to myUSO, and turn on the myHomework feature in site 'settings'.

If you are not an LGfL or TRUSTnet connected school and wish to get set up with myHomework, and the myUSO range of helpful tools for schools please don't hesitate to get in touch.
